# Preface

Founded in 1980, **Bhanero Textile Mills Ltd. (“BTM”)** operates as a key entity within the Umer Group of Companies (“UGC”). While UGC maintains a diversified business portfolio spanning footwear retail and manufacturing, real estate development, dairy farming, and the sugar industry, textiles have consistently remained the cornerstone of its operations and strategic focus.

The company showed a modest recovery and posted profit after tax of PKR 114,229,053 during the current year ending June 30, 2025 marking an improvement from the last year ending June 30, 2024 where it posted a significant loss after tax of PKR (131,761,151). .

The Umer Group operates its textile business through several entities, including Bhanero Textile Mills Ltd (“BTM”), Faisal Spinning Mills Ltd (“FSM”), and Blessed Textiles Ltd (“BTL”), with a total of seven spinning units, three weaving units, and one finishing and stitching facility.

Total Spinning Units have 225,600 spindles.

Total Weaving Units have 567 looms.

Finishing /Processing have production capacity of 33.00 million approximately.

Collectively, these textile entities posted after tax loss of PKR -251.919 million (FY 2024:PKR -3,221.764) million against sales revenue of PKR 109.544 billion (FY 2024: PKR 109.908 billion) for the year ending June 2025. Apart from BTM both FSM and BTL posted a loss during the current year under review.

The group posted a loss of -0.23 percent as compared to last year where it posted a loss after tax -2.93 percent on sales during the fiscal year 2024-25 whereas sales remains stagnant during the current year.

The subpar performance during the fiscal year 2024-25 can be attributed to a range of operational and macroeconomic challenges faced by the group, including;

- Elevated interest rates, straining liquidity and thin gross margins.
- Volatility of yarn and cotton pricing in the international markets and shortage of locally produced raw cotton.
- Weak demand in key export markets led to reduced order volumes and pricing pressures.
- High energy prices, which are significantly impacting its competitiveness and operational costs.

The company continues to face elevated inventory levels due to slower turnover and sustained pricing pressures. Energy costs also remain high, accounting for approximately 11 percent of total cost of sales, consistent with the previous year.

Recognizing these challenges, the Board has implemented proactive measures to stabilize operations and strengthen financial performance. Encouragingly, the ongoing decline in inflation and policy rates is easing cost pressures. Lower interest rates are expected to support margin improvement, bolster working capital, facilitate BMR initiatives for machinery upgrades, and boost export competitiveness.

The BTM took measures to combat with the rising energy prices and approx 850.00 million has been spent so far on solar energy initiatives of 10 MW across its units in Punjab and Sindh. Of the total energy requirement, 8 percent has been met through renewable energy whereas 92 percent is still met through thermal energy.

# Corporate Information

8

## Incorporation

The company **Bhanero Textile Mills Limited** established in March 1980.

## Symbol

BHAT

## Legal Status

Public Limited Company.

## Capital

Authorized Capital - 60,000,000

Issued Paid-up Capital - 30,409,640

*(Ordinary Shares of Rs. 10 each)*

## Associated Undertakings

Faisal Spinning Mills Ltd

Blessed Textiles Ltd

## Registered and Liaison Office

Registered office of the company is located at Umer House, 23/1, Sector 23, K.I.A , Karachi.

Liaison office of the company is located at City Towers, Main Boulevard, Gulberg-II, Lahore.

## Manufacturing Units

- i) Spinning Unit I with an installed capacity of 27,840 spindles, located at Kotri, Sindh.
- ii) Spinning Unit II with an installed capacity of 52,272 spindles, located at Sheikhupura, Punjab.
- iii) Weaving Unit III with an installed capacity of 162 air-jet looms, located at Sheikhupura, Punjab.
- iv) Spinning Unit IV with an installed capacity of 19,584 spindles.

## Credit Rating

The entity's rating reaffirmed at A+/A-1 (Single A Plus / A One) with 'Stable' outlook on given ratings is based on assessment by Messer's VIS Credit Rating Company Limited on January 30, 2025.

## Governing Board

10

The governing board comprised of ten(10) members and all the appointments of independent, executive, non-executive and female directors are in line under the under Code of Corporate Governance Regulations, 2019. All the members of the governing board are accredited under Directors Training Program. The next reconstitution of board is scheduled for January , 2026.

Sr	Names of Directors	Designation
1	Mr. Mohammad Salim	Executive Director
2	Mr. Mohammad Shaheen	Director / Chairman
3	Mr. Hamza Shakeel	Director
4	Mr. Khurrum Salim	Executive Director / CEO
5	Mr. Bilal Sharif	Director
6	Mr. Mohammad Amin	Director
7	Mr. Tauqeer Ahmed Sheikh	Independent Director
8	Mrs. Saba Yousaf	Female Director
9	Mr. Asif Elahi	Independent Director
10	Mr. Mustafa Tanvir	Independent Director

# Global Outlook of Textile Sector

13

The global textile industry is undergoing a marked slowdown, driven by multiple interrelated factors. Key among them are the recent imposition of U.S. tariffs, heightened global focus on sustainability and shifting trade policies across Western economies.

In Pakistan, the textile sector's profitability has been significantly impacted by soaring energy prices and elevated borrowing costs. These financial pressures are further intensified by regressive fiscal policies, which have strained liquidity specially for exporters operating on thin margins. The imposition of the Captive Power Levy and persistent delays in sales tax refunds have compounded the stress, resulting in widespread factory closures and a notable decline in production capacity.

Despite considerable domestic and global challenges, Pakistan's textile exports demonstrated resilience in FY 2024-25, rising by 7.22 percent to US\$17.88 billion, compared to US\$16.68 billion in FY 2023-24. While upstream segments like cotton yarn and cloth declined, robust growth in value-added categories such as knitwear and readymade garments highlighted shifting global demand and Pakistan's evolving export strategy.

As textiles and apparel remain the backbone of Pakistan's economy, this is a need for concrete measures to secure long-term global market share hence, the government must prioritize:

- Long-term financing for renewable energy to reduce manufacturing costs and meet climate compliance standards.
- Investment in research and development to drive innovation and improve productivity.
- Market diversification strategies to reduce reliance on traditional export destinations.
- Structural reforms to eliminate inefficiencies across the supply chain.

Equally important is the revival of domestic cotton production, which requires immediate and focused efforts to ensure the availability of high-yield, pest-resistant seed varieties. Strengthening the cotton base is essential not only for reducing reliance on imports but also for reinforcing the entire textile value chain.

A robust cotton supply will enhance cost efficiency, support value-added manufacturing, and ultimately boost Pakistan's export competitiveness in global markets.
